(b)(6)

Does Group III have a bond with you guys? I got another call from(b)(6), but I told him that I don't have copies of subcontractor bonds since we don't require them. I feel bad for the guy, but I don't think there's anything more I can do for him? If you have a copy of Group III's bond, can you please send it over to him?

Thanks!

Good morning (b)(6) I recently found out about this and have notified G3. The REA is not part of this. Since blast windows are not in G3's contract with us we told them they could invoice us immediately and DUSA would

pay this while we push our REA to you. I will continue to engage G3 to pay(b)(6) since we paid G3. Thank you. R/(b)

Good morning S(b)(6) . Two days ago I received an unpleasant phone call from (b)(6) , Owner, Ernest Glass, alleging he is having money on his contract held back by you. I intended to bring this up to (b) when we next spoke. I'll see (b) today. Meanwhile (b)(6) contacted NAVFAC's contracting officer with a complaint. You owe an answer I can provide NAVFAC. You have been paid 100% of the window frames and glazing by Dragados. I am not aware why you are withholding $75K from Ernest.

The cost proposal you submitted to me for the blast windows (above and beyond your contract) was responded to by me stating you can invoice this amount immediately since we have to argue our case for reimbursement with NAVFAC and your contract didn't include the work. I am still waiting for you to invoice me $43,691 ($35,056.00 to Ernest Glass).

25	CLEO	Aluminum & Glazing - subcontract	$128,000	$128,000	$128,000	$128,000	$-	100.00%
58	VC	Subcontract - aluminum & glazing	$123,000	$123,000	$123,000	$123,000	$-	100.00%

Thank you for your attention to this matter. R/(b)

(b) -

I got a complaint from Ernest Glass Co., Inc. regarding non-payment from Group III. When I realized this was for

windows, I looked over the REA you submitted yesterday, and I saw that name as the sub. However, that appears to be for about $35K for them. They say that their subcontract with Group III was for about $264,000, and that they have not been paid about $75,000. Since this was a REA and the work is already done, have you paid Group III? Or are we waiting on the REA? Also, what about the extra $40,000? Can you look into it? They have the ear of a construction manager here... They also asked for your bond info, which I'm not sure they are even eligible to go after under the Miller Act, but I will have to give to them.

Thanks!

Subject: TRANSMITTAL 1222, SPEC 33 82 00, TELECOMMUNICATIONS OUTSIDE PLANT, SD-06, TEST REPORTS, CLEO ACCEPTANCE TESTS, 24SM FOC AND 50PR COPPER

Good afternoon. Attached is transmittal 1222 which are the submittals for acceptance testing of the 24SM FOC and 50PR copper telecommunication cables (Outside Plant). This is submitted IAW SPEC 33 82 00, Telecommunications Outside Plant, paragraphs 3.5.2.1. and 3.5.2.2. Hard copies of this are being delivered to your offices with parallel routing to the designer and Base Telephone [redacted]).

Good afternoon [redacted]. These cables are complete and continuous through to the telecommunications backboard inside of the CLEO Admin building. They are pulled into but not spliced into the cabinet in front of the lift station in front of the dog kennels.

Thanks. R[redacted]

Subject: [Non-DoD Source] FW: RFI for Gatehouse door 122A
Date: Friday, February 19, 2016 15:04:25
Importance: High

Good afternoon [redacted] – Will you please read the below and advise on how you want us to proceed?
Thanks. R/ [redacted]

[redacted] – good job describing this in the most simple terms.

From [redacted] [mailto[redacted]]
Door 122A is not noted as being a bullet resistant door. All of the other doors are bullet resistant, at the gatehouse (please see the door schedule on sheet A-601). This seems curious to us b/c this door leads into the NMCI room – probably the most critical room in the building! With that stated, the frame the supplier sent is bullet resistant. It has already been installed. The door is not bullet resistant and has not been installed. We have 2 options here:

1) Install the non-bullet resistant door. This will require a modification to the frame to accommodate the hinges. No cost.

2) Order and install a bullet resistant door to match all of the other doors at the gatehouse. This will be a change order.

Subject: TRANSMITTAL 1222, SPEC 33 82 00, TELECOMMUNICATIONS OUTSIDE PLANT, SD-06, TEST REPORTS, CLEO ACCEPTANCE TESTS, 24SM FOC AND 50PR COPPER

Good afternoon. Attached is transmittal 1222 which are the submittals for acceptance testing of the 24SM FOC and 50PR copper telecommunication cables (Outside Plant). This is submitted IAW SPEC 33 82 00, Telecommunications Outside Plant, paragraphs 3.5.2.1. and 3.5.2.2. Hard copies of this are being delivered to your offices with parallel routing to the designer and Base Telephone ([redacted]).

Good afternoon [redacted]. These cables are complete and continuous through to the telecommunications backboard inside of the CLEO Admin building. They are pulled into but not spliced into the cabinet in front of the lift station in front of the dog kennels.

Thanks. R/[redacted]

Subject: Third Group III Subcontractor Complaint

[redacted]-

I got a complaint from Ernest Glass Co., Inc. regarding non-payment from Group III. When I realized this was for windows, I looked over the REA you submitted yesterday, and I saw that name as the sub. However, that appears to be for about $35K for them. They say that their subcontract with Group III was for about $264,000, and that they have not been paid about $75,000. Since this was a REA and the work is already done, have you paid Group III? Or are we waiting on the REA? Also, what about the extra $40,000? Can you look into it? They have the ear of a construction manager here... They also asked for your bond info, which I'm not sure they are even eligible to go after under the Miller Act, but I will have to give to them.

Thanks!

Subject: [Non-DoD Source] RE: Third Group III Subcontractor Complaint
Date: Thursday, February 18, 2016 9:26:00

Good morning [redacted] I recently found out about this and have notified G3. The REA is not part of this. Since blast windows are not in G3's contract with us we told them they could invoice us immediately and DUSA would pay this while we push our REA to you. I will continue to engage G3 to pay Ernest since we paid G3. Thank you.
R/[redacted]

Good morning [redacted]. Two days ago I received an unpleasant phone call from [redacted], Owner, Ernest Glass, alleging he is having money on his contract held back by you. I intended to bring this up to [redacted] when we next spoke. I'll see [redacted] today. Meanwhile, [redacted] contacted NAVFAC's contracting officer with a complaint. You owe an answer I can provide NAVFAC. You have been paid 100% of the window frames and glazing by Dragados. I am not aware why you are withholding $75K from Ernest.

The cost proposal you submitted to me for the blast windows (above and beyond your contract) was responded to by me stating you can invoice this amount immediately since we have to argue our case for reimbursement with NAVFAC and your contract didn't include the work. I am still waiting for you to invoice me $43,691 ($35,056.00 to Ernest Glass).

25	CLEO	Aluminum & Glazing - subcontract	$128,000	$128,000	$128,000	$128,000	$-	100.00%
58	VC	Subcontract - aluminum & glazing	$123,000	$123,000	$123,000	$123,000	$-	100.00%

Thank you for your attention to this matter. R/[redacted]

Section 23 09 23.13 22 SD-05

3.5.2 Performance Verification Test

GEOTHERMAL WATER SYSTEM – GAME WARDEN

1. THE GEOTHERMAL WATER SYSTEM (GTWS) SHALL BE ENABLED AT ALL TIMES.

#	Test	Response	Comment	Pass/Fail
	Pump-1 START/STOP			
	ENABLE THE GEOTHERMAL WATER SYSTEM	PUMP-1 SHALL START AND RUN CONTINUOUSLY		
	DISABLED THE GEOTHERMAL WATER SYSTEM	PUMP-1 SHALL STOP		

2. PUMP-1 SHALL MODULATE TO MAINTAIN THE GEOTHERMAL WATER SYSTEM DIFFERENTIAL SET POINT.

#	Test	Response	Comment	Pass/Fail
	SECONDARY CHW PUMP CONTROL			
	WITH THE GTWS RUNNING, OVERRIDE THE DIFFERENTIAL SETPOINT ABOVE THE CURRENT DIFFERENTIAL PRESSURE.	THE VFD SHALL INCREASE SPEED TO MAINTAIN THE NEW DIFFERENTIAL PRESSURE SETPOINT		
	OVERRIDE THE DIFFERENTIAL SETPOINT BELOW THE CURRENT DIFFERENTIAL PRESSURE	THE VFD SHALL DECREASE SPEED TO MAINTAIN THE NEW DIFFERENTIAL PRESSURE SETPOINT		

3. ALARMS SHALL BE SENT FOR PUMP FAILURE AND GEOTHERMAL LEAK.

#	Test	Response	Comment	Pass/Fail
	ALARMS			
	COMMAND PUMP-1 ON AND PLACE THE DISCONNECT TO OFF POSTIION	AFTER 90 SECONDS AN ALARM SHALL BE GENERATED (CHW P-1 FAILURE)		
	POSITION DRAIN HAND VALVE TO ALLOW FLOW THROUGH THE GEOTHERMAL WATER MAKE-UP SMART METERS.	AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Name:_____ **Company:**_____ **Date:**_____

3.5.2 Performance Verification Test

HPHW-1 WATER HEATER SYSTEM – GAME WARDEN

1. SYSTEM SHALL BE ENABLED AT ALL TIMES.
2. THE HPHW-1 SHALL MAINTAIN THE WATER TANK TEMPERATURE AT 130 DEG F.

#	Test	Response	Comment	Pass/Fail
	HPHW-1			
	RAISE THE HPHW-1 TANK TEMP SETPOINT ABOVE CURRENT TANK TEMP	HPHW-1 AND PUMP-2 SHALL BE ENERGZIED		
	LOWER THE HPHW-1 TANK TEMP SETPOINT BELOW THE CURRENT TANK TEMP	HPHW-1 AND PUMP-2 SHALL BE DE-ENERGZIED		

3. THE ELECTRIC WATER HEATER SHALL BE ENABLED IF THE TANK TEMP DROPS BELOW 120 DEG F.
4. THE ELECTRIC WATER HEATER SHALL HEAT THE WATER INSIDE THE TANK TO 140 DEG F ONCE A MONTH

#	Test	Response	Comment	Pass/Fail
	EHW-1			
	RAISE THE EWH-1 TANK TEMP SETPOINT ABOVE THE CURRENT TANK TEMP	EWH-1 SHALL BE ENERGZIED		
	LOWER THE EWH-1 TANK TEMP SETPOINT BELOW THE CURRENT TANK TEMP	EWH-1 SHALL BE DE-ENERGIZED		
	CHANGE THE CALENDER SO THAT THE EWH-1 IS SCHEDULED TO RAISE THE WATER TEMP TO 140 DEG F	EWH-1 SHALL BE ENERGIZED UNTIL THE WATER TEMP IS RAISE TO 140 DEG F		

5. PUMP-3 SHALL BE ENERGIZED IN THE OCCUPIED MODE IF THE TEMP SENSOR LOCATED AT THE FARTHEST HOT WATER RECEIVING FIXTURE DROPS BELOW 95 DEG F.
6. IF PUMP IS ENERGIZED, IT SHALL RUN FOR A MINIMUM OF 3 MINUTES.

#	Test	Response	Comment	Pass/Fail
	PUMP-3			
	PLACE THE SYSEM IN THE OCCUPIED MODE AND RAISE THE FIXTURE TEMP SETPOINT ABOVE THE CURRENT FIXTURE TEMP	PUMP-3 SHALL START		
	LOWER THE FIXTURE TEMP SETPOINT BELOW THE CURRENT FIXTURE TEMP	PUMP-3 SHALL STOP IF IT HAS BEEN RUNNING FOR MORE THAN 3 MINUTES OR RUN UNTIL 3 MINTUES HAS ELAPASED AND THEN STOP		

7. ALARMS SHALL BE SENT FOR PUMP FAILURES AND LOW WATER HEATER STORAGE INLET TEMP.

#	Test	Response	Comment	Pass/Fail
	ALARMS			
	COMMAND P-2 ON AND PLACE THE DISCONNECT IN THE OFF POSITION	AFTER 90 SECONDS AN ALARM SHALL BE GENERATED		
	COMMAND P-3 ON AND PLACE THE DISCONNECT IN THE OFF POSITION	AFTER 90 SECONDS AN ALARM SHALL BE GENERATED		
	RAISE THE INLET WATER STORAGE TANK TEMP SETPOINT ABOVE THE CURRENT TEMP	AFTER 30 SECONDS AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Name:_____ **Company:**_____ **Date:**_____

Performance Test Report

Section 23 09 23.13 22 SD-05

3.5.2 Performance Verification Test

ERV-1

1. THE ERV SHALL RUN CONTINUOUSLY DURING THE OCCUPIED MODE AND SHUTDOWN IN THE UNOCCUPIED MODE

#	Test	Response	Comment	Pass/Fail
	ERV-1 START/STOP CONTROL			
	OVERRIDE THE SYSTEM TO UNOCCUPIED MODE	ERV-1 SUPPLY AND EXHAUST FAN SHALL STOP AND THE OUTSIDE AND EXHAUST AIR DAMPERS SHALL CLOSE		
	OVERRIDE THE SYSTEM TO OCCUPIED MODE	OUTSIDE AND EXHAUST AIR DAMPER SHALL OPEN AND THE SUPPLY AND EXHAUST FANS SHALL START AND RUN CONTINUOUSLY		

2. THE UNIT SHALL SHUTDOWN UPON A SIGNAL FROM THE FIRE ALARM OR ATFP.
3. UPON SHUTDOWN, THE FANS SHALL STOP AND THE DAMPERS SHALL CLOSE.

#	Test	Response	Comment	Pass/Fail
	SAFETY INTERLOCKS			
	TRIGGER THE ATFP BUTTON	ERV WILL SHUTDOWN, SUPPLY AND RETURN FANS WILL STOP AND DAMPER SHALL CLOSE		

4. ALARMS SHALL BE SENT IF THE FOLLOWING CONDITIONS ARE MET:
   a. SUPPLY FAN AND EXHAUST FAIL TO RUN
   b. DIRTY FILTER

#	Test	Response	Comment	Pass/Fail
	ERV-1 ALARMS			
	TRIP THE OA FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		
	TRIP THE EA FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		
	COMMAND ERV "ON" AND PLACE THE DISCONNECT IN THE OFF POSITION	AFTER 90 SECONDS AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

3.5.2 Performance Verification Test

HP-1 – Game Warden

1. DURING THE OCCUPIED MODE THE HP-1 SHALL MAINTAIN A COOLING SETPOINT OF 75 DEG F AND A HEAT SETPOINTING OF 70 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-1 OCCUPIED MODE			
	OVERRIDE THE SYSTEM TO OCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE OUTSIDE AIR DAMPER WILL OPEN AND THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F AND THE OUTSIDE AIR DAMPER SHALL CLOSE		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE OUTSIDE AIR DAMPER WILL OPEN AND THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F AND THE OUTSIDE AIR DAMPER SHALL CLOSE		

2. DURING THE UNOCCUPIED MODE THE HP-1 SHALL MAINTAIN A COOLING SETPOINT OF 85 DEG F AND A HEAT SETPOINTING OF 60 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-1 UNOCCUPIED MODE			
	OVERRIDE THE SYSTEM TO UNOCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE OUTSIDE AIR DAMPER WILL OPEN AND THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F AND THE OUTSIDE AIR DAMPER SHALL CLOSE		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE OUTSIDE AIR DAMPER WILL OPEN AND THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		

	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F AND THE OUTSIDE AIR DAMPER SHALL CLOSE		
	PRESS THE OCCUPANCY OVERRIDE BUTTON THE THERMOSTAT ASSOCIATED WITH THE UNIT	UNIT SHALL BE PLACED IN OCCUPIED MODE PER INTERNAL CONTROLS		

3. THE UNIT SHALL SHUTDOWN UPON A SIGNAL FROM THE FIRE ALARM OR ATFP.
4. UPON SHUTDOWN, THE FAN SHALL STOP AND THE OUTSIDE AIR DAMPER SHALL CLOSE.

#	Test	Response	Comment	Pass/Fail
	SAFETY INTERLOCKS			
	CHANGE THE SETPOINT TO FORCE THE HP-1 TO RUN. TRIGGER THE ATFP BUTTON	HP WILL SHUTDOWN		

5. ALARMS SHALL BE SENT IF THE FOLLOWING CONDITIONS ARE MET:
    a. DIRTY FILTER STATUS

#	Test	Response	Comment	Pass/Fail
	HP ALARMS			
	TRIP THE FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Name:_____ **Company:**_____ **Date:**_____

3.5.2 Performance Verification Test

HP-2 – Game Warden

1. DURING THE OCCUPIED MODE THE HP-2 SHALL MAINTAIN A COOLING SETPOINT OF 75 DEG F AND A HEAT SETPOINTING OF 70 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-2 OCCUPIED MODE			
	OVERRIDE THE SYSTEM TO OCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		

2. DURING THE UNOCCUPIED MODE THE HP-2 SHALL MAINTAIN A COOLING SETPOINT OF 85 DEG F AND A HEAT SETPOINTING OF 60 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-2 UNOCCUPIED MODE			
	OVERRIDE THE SYSTEM TO UNOCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F		
	PRESS THE OCCUPANCY OVERRIDE BUTTON THE THERMOSTAT ASSOCIATED WITH THE UNIT	UNIT SHALL BE PLACED IN OCCUPIED MODE PER INTERNAL CONTROLS		

3. THE UNIT SHALL SHUTDOWN UPON A SIGNAL FROM THE FIRE ALARM OR ATFP.

4. UPON SHUTDOWN, THE FAN SHALL STOP AND THE OUTSIDE AIR DAMPER SHALL CLOSE.

#	Test	Response	Comment	Pass/Fail
	SAFETY INTERLOCKS			
	CHANGE THE SETPOINT TO FORCE THE HP-2 TO RUN. TRIGGER THE ATFP BUTTON	HP WILL SHUTDOWN		

5. ALARMS SHALL BE SENT IF THE FOLLOWING CONDITIONS ARE MET:
   b. DIRTY FILTER STATUS

#	Test	Response	Comment	Pass/Fail
	HP ALARMS			
	TRIP THE FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Name:_____ **Company:**_____ **Date:**_____

Section 23 09 23.13 22 SD-05

3.5.2 Performance Verification Test

HP-3 – Game Warden

1. DURING THE OCCUPIED MODE THE HP-3 SHALL MAINTAIN A COOLING SETPOINT OF 75 DEG F AND A HEAT SETPOINTING OF 70 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-3 OCCUPIED MODE			
	OVERRIDE THE SYSTEM TO OCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		

2. DURING THE UNOCCUPIED MODE THE HP-3 SHALL MAINTAIN A COOLING SETPOINT OF 85 DEG F AND A HEAT SETPOINTING OF 60 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-3 UNOCCUPIED MODE			
	OVERRIDE THE SYSTEM TO UNOCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F		
	PRESS THE OCCUPANCY OVERRIDE BUTTON THE THERMOSTAT ASSOCIATED WITH THE UNIT	UNIT SHALL BE PLACED IN OCCUPIED MODE PER INTERNAL CONTROLS		

3. THE UNIT SHALL SHUTDOWN UPON A SIGNAL FROM THE FIRE ALARM OR ATFP.

4. UPON SHUTDOWN, THE FAN SHALL STOP AND THE OUTSIDE AIR DAMPER SHALL CLOSE.

#	Test	Response	Comment	Pass/Fail
	SAFETY INTERLOCKS			
	CHANGE THE SETPOINT TO FORCE THE HP-3 TO RUN. TRIGGER THE ATFP BUTTON	HP WILL SHUTDOWN		

5. ALARMS SHALL BE SENT IF THE FOLLOWING CONDITIONS ARE MET:
   c. DIRTY FILTER STATUS

#	Test	Response	Comment	Pass/Fail
	HP ALARMS			
	TRIP THE FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Name:_____ **Company:**_____ **Date:**_____

3.5.2 Performance Verification Test

HP-4 – Game Warden

1. DURING THE OCCUPIED MODE THE HP-4 SHALL MAINTAIN A COOLING SETPOINT OF 75 DEG F AND A HEAT SETPOINTING OF 70 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-4 OCCUPIED MODE			
	OVERRIDE THE SYSTEM TO OCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		

2. DURING THE UNOCCUPIED MODE THE HP-4 SHALL MAINTAIN A COOLING SETPOINT OF 85 DEG F AND A HEAT SETPOINTING OF 60 DEG F. UNIT SHALL CYCLE ON TO MAINTAIN THE OCCUPIED HEATING AND COOLING SETPOINT.

#	Test	Response	Comment	Pass/Fail
	HP-4 UNOCCUPIED MODE			
	OVERRIDE THE SYSTEM TO UNOCCUPIED MODE AND RAISE THE HEATING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE HEATING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE OF F		
	LOWER THE COOLING SETPOINT BELOW THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCLE ON AND OPERATE ON INTERNAL CONTROLS TO MAINTAIN THE SETPOINT		
	LOWER THE COOLING SETPOINT ABOVE THE CURRENT SPACE TEMP	THE HEATPUMP WILL CYCCLE OF F		
	PRESS THE OCCUPANCY OVERRIDE BUTTON THE THERMOSTAT ASSOCIATED WITH THE UNIT	UNIT SHALL BE PLACED IN OCCUPIED MODE PER INTERNAL CONTROLS		

3. THE UNIT SHALL SHUTDOWN UPON A SIGNAL FROM THE FIRE ALARM OR ATFP.

4. UPON SHUTDOWN, THE FAN SHALL STOP AND THE OUTSIDE AIR DAMPER SHALL CLOSE.

#	Test	Response	Comment	Pass/Fail
	SAFETY INTERLOCKS			
	CHANGE THE SETPOINT TO FORCE THE HP-4 TO RUN. TRIGGER THE ATFP BUTTON	HP WILL SHUTDOWN		

5. ALARMS SHALL BE SENT IF THE FOLLOWING CONDITIONS ARE MET:
    d. DIRTY FILTER STATUS

#	Test	Response	Comment	Pass/Fail
	HP ALARMS			
	TRIP THE FILTER DIFFERENTIAL PRESSURE TO SIMULATE A DIRY FILTER	AN ALARM SHALL BE GENERATED		

THIS UNIT HAS BEEN TESTED AND VERIFIED TO BE OPERATING PER DESIGN

Date: Monday, February 01, 2016 9:46:00

Hi guys -

Just curious, what other contract are they in? Are we sure we're not missing something from ours? Just confused as all of our other contracts in the area are complete...

Thanks!

Good afternoon. I am resending this email from 3Nov and adding [redacted] (Base PMO) to this email because he inquired to my superintendent when we're putting the Wilson gate crash barrier arms in. As you know, we're not, they are in another contract. Thanks. R[redacted]

[redacted]

Yes, TAB prerequisite HVAC work checkout list.

I should note, for clarification overall, the task numbers change as additional tasks are added within the schedule due to reviews, resubmittals, etc., so the task title should be referenced instead (e.g.: TAB prerequisite HVAC work checkout list) of the number. For example, once I receive the HVAC checklist, the checklist review task for CI52 will become Task 21 and the pre-PVT checklist Task 22 (from 21), etc. on down the list until the last task. I admit this is not the best numbering scheme, but it is the one CI52 has adopted due to the number of tasks involved and the potential resubmittals. The one handy feature is the Task Prerequisite column actually changes to match (more formula "magic") as the subsequent task numbers change. This is even true of tasks like the PVT field work task with multiple prerequisites.

To illustrate the above, I have updated the task schedule to include the Site Observation field visit (#18) I performed last July, with its associated comment document (inserted as #19) and anticipated KTR responses (inserted as #20), which shifts the task numbers for the items below it. I was actually looking at this version, updated Friday, when I referred to the HVAC checklist as Task 22, which it now is.

Respectfully,

[redacted]

The Schedule Task 22 is the submission of the completed Pre-TAB checklist, after the TAB agency reviews the construction progress to confirm the status of the project, as noted in 23 05 93 Appendix A, section 2 f and section 3.c, along with Appendix C, sequence entitled "Advance Notice of Season 1 TAB Field Work". Attached is an example Pre-DALT checklist from your TAB agency, from a single piece of equipment on another project. The Pre-TAB checklist is similar.

Importance: High

Good afternoon (b)(6) [redacted].

Bottom line up front: I have designer concurrence to transmittal 925 Rev-2 and I seek your concurrence to it.

Background: This submittal is for the HVAC controls for the CLEO. It's been very challenging and the CEMS engineer isn't satisfied my subcontractor is showing the control valve connection for the heat pumps to the DDC system as requested and shown on the stamped and signed drawings. It's not an intentional omission on our part and we weren't able to resolve this through discussion with CEMS. (b)(6) [redacted] and (b)(6) [redacted] followed the discussion and when it reached a stale-mate recommend approval 'AS-NOTED WITH AN UPDATED ELECTRONIC COPY TO FOLLOW"

Issue: We're providing the heat pump control valve. At the time of this submittal, Johnson Controls was providing

control of the heat pump. Our DDC sub didn't want to put his control on top of the Johnson Control to control the heat pump. CEMS feels this is necessary.

Solution: My sub will add the necessary controls to satisfy the requirement and we will proceed with an updated electronic copy of the transmittal.

(b)(6) – Do you feel I stated this accurately?

Thanks. R/

---

(b)(6)

Task #15 is actually a review of the design documents by CI52. It is similar to the TAB agency Design Review but encompasses controls and any significant constructability issues. It is typically performed during the design development phase of the project. Looking back through our documentation, I cannot find where it was performed, but believe this was completed. I will remove it from the Tracking Schedule (Marked as "Unknown" since I don't have a specific date).

I am hesitant to provide the Excel file because the worksheet has over 700 rows and over 100 columns, the display of each is controlled by embedded formulas keyed from the entered dates and other settings, some on other Tabs. For this reason, maintenance of the schedule is upon CI52.

The dates shown on the schedule attached were those given to me early last Winter for estimated completion of submittals, etc., and obviously need updates based on the number of "red" overdue dates.

At present, the only "actionable" item is #20, KTR responses to the Site Observation 01 comments issued last July. There were only two comments needing responses. I can resend those comments.

To clarify the tracking process:

Due Dates are populated by either manual entry, calculated from a prerequisite, or offset from a previous task. Testing Start Dates are populated by manual entry only. Manual entry dates are based on input from Dragados or CI52, depending on the responsible party for the task. For example, task #18 field work Start and End Dates was entered by CI52 and the task #19 comment Due Date calculated based on the task #18 End Date, with the offset shown in the Ref/Notes column. Further, task #20 KTR responses Due Date was calculated based on the task #19 Actual Date, prerequisite to task #20 and using the 2 week minimum offset (01 Jul to 15 Jul). For each iteration of Comment->Responses->Close-out/Follow-up (CRC/F cycle), the schedule "adds" rows accordingly (we've not done follow-up on any task yet). When a task is closed out (no further responses, follow-up, or action is required), "Not Required" is entered in the Actual/End Date cell or the CRC/F cycle naturally ends.

Please let me know if you have any other questions. I will update the schedule when I receive the updates mentioned in your previous Meeting email. Thank you.

Respectfully,

(b)

Subject: [Non-DoD Source] CI52 ACCEPTANCE TESTING SCHEDULE

Good morning (b) Will you please send me the Excel format of the C152 acceptance test schedule? This will make tracking and coordination easier and I will track versions by including a date in the file name.

Also, I have a question about row #15 on this schedule. What is this?

Thanks. R/ (b)

Good afternoon (b)(6) The bottom email is from a Department of Labor (DoL) Wage Hour Determination Investigator (b)(6)). An employee of a second-tier subcontractor on our project is accusing his employer of improper wage determination.

Attached is a copy of a sample letter that will be sent to each contracting officer for each of the four Davis Bacon contracts that you have identified that your company has worked on in the last two years. We must have all of this information, especially the Contract Date(s) information and the Wage Determination(s), before any work can be done on the spreadsheets that you filled out and e-mailed to your office. The Prime contractors normally provide the Point of Contact (POC) for the Contracting Officers, however, if you have a (POC) for each contracting officer for each of the four contracts that I can contact, that would help move the investigative process along a litter faster. Please feel free to contact me if you should have any other questions.

I'm not sure of the professional relationship between DoD and DoL but you can read for yourself that his intent is for the Contracting officer to respond. Will you respond to this investigator with the information he is requesting? Thanks. R/ (b)

Attached is the request for information letter

Please forward to the appropriate party that can provide this information as soon as possible.

If this investigator can not get this information in a timely manner, he can make all of us contractors very miserable.

I only want to conclude this investigation as soon as possible for my company.

I am sure you would like this also.

Thanks

Dear Contracting Officer

Could you please provide the following information concerning a Davis Bacon investigation that our office is conducting of Lee Mechanical, Inc. who was a sub contractor for various Prime contractors during the two year investigative period of 11/24/13 to 11/22/15. Please provide the following information for each contract.

- Name of Federal funding statute(s)
- Contract number, amount and brief description of contract work.
- Name of Federal contracting agency financing the project and its local representative, and the name of the State or local contracting authority and name of its representative (and the name of the owner / grantee, where appropriate)
- Date contract was advertised for bids
- Date contract was awarded
- Starting and completion date of contract and amount remaining on contract.
- Information as to whether the contract contained the contract provision in Reg. 5.5 for DBRA/CWHSSA. Please provide PDF copies of the portion of the contract containing these provisions.
- Applicable Wage Determination(s) and modifications
- Legal name and address of the prime contractor, including the name and title of the responsible official, plus identifying information regarding any other ongoing contracts held by the same prime contractor.

If you should have any questions, please feel free to call my office.

Kind regards,

(b)(6) [redacted] Wage Hour Investigator

Subject: WILSON GATE ELECTRICAL - AVB HEAT TRACE

Good afternoon. Please see the attachment. EP601 indicates that the AVB heat trace is to enter the MDP panel which is 277/480 voltage. The attached photos show the AVB heat trace data plate which calls for 120 volt.

Q: Do you want the AVB heat trace (120 volt) connected to the MDP panel (277 volt)? My electrical subcontractor recommends connecting in adjacent panel L1 which has spares in it (see again EP601). Cost, if any, is minimal.

Thanks. R(b)(6)
